In the Claims:

Please amend the claims as follows:

1	15.	(Currently Amended) A wall unit form and a wall unit comprising:
2		a first surface, formed by an interior surface of a first wall panel;
3		a second surface operatively attached to said first surface, said second surface formed
4	by an	interior surface of a second wall panel;
5		end surfaces operatively attached to said first and second surfaces thereby forming an
6	uprig	ht form and opposing sides, said end surfaces formed by interior surfaces of end wall
7	рапе	
8		wherein at least one of said first, second and end surfaces simultaneously provides
9	only	horizontal supports to a plurality of layers of discrete components during, but not prior
10	to, a	single pour application of a binding material to the wall unit form, thereby forming at
11	<u>lcast</u>	one wall unit having a substantially vertical surface of said plurality of layers of
12	disc	rete components; and
13		further wherein at least of one of said first, second and end surfaces is shaped
14	<u> ငဂ္ဂၢ</u>	figured to be removably attached from one another to facilitate entry into a volume
	defi	ned by the upright form, said entry being during placement of said discrete components.

16. (Previously Amended) The wall unit form and wall unit of claim 15, wherein at least one of the first surface, the second surface, and the end surfaces, is characterized by a nonrectangular aspect.

- 17. (Previously Amended) The wall unit form and wall unit of claim 15, wherein at least one of the first surface, the second surface, and the end surfaces, is characterized by curvilinear edges.
- 1 18. (Previously Amended) The wall unit form and wall unit of claim 15, further
 2 including said second and said end surfaces being hingedly attached to said first surface.
- 1 19. (Previously Amended) The wall unit form and wall unit of claim 15, further including a volume which will produce an integral footing when filled.
- 20. (Previously Amended) The wall unit form and wall unit of claim 15, further including a pocket structure operatively attached to at least one of said surfaces.
- 21. (Previously Amended) The wall unit form and wall unit of claim 19, further including an integral-footing-producing volume having radiused corners.
